<u>AROUS BELLIANTES OFFICIALISMOS ALBURA</u>

TO ALL TO WHOM THESE PRESENTS SHALL COME:

Pioneer Bi-Bred International, Inc.

Concreas. There has been presented to the

Secretary of Agriculture

AN APPLICATION REQUESTING A CERTIFICATE OF PROTECTION FOR AN ALLEGED NOVEL VARIETY OF SEXUALLY REPRODUCED PLANT, THE NAME AND DESCRIPTION OF WHICH ARE CONTAINED IN THE APPLICATION AND EXHIBITS, A COPY OF WHICH IS HEREUNTO ANNEXED AND MADE A PART HEREOF, AND THE VARIOUS REQUIREMENTS OF LAW IN SUCH CASES MADE AND PROVIDED HAVE BEEN COMPLIED WITH, AND THE TITLE THERETO IS, FROM THE RECORDS OF THE PLANT VARIETY PROTECTION OFFICE, IN THE APPLICANT(S) INDICATED IN THE SAID COPY, AND WHEREAS, UPON DUE EXAMINATION MADE, THE SAID APPLICANT(S) IS (ARE) ADJUDGED TO BE ENTITLED TO A CERTIFICATE OF PLANT VARIETY PROTECTION UNDER THE LAW.

NOW, therefore, this certificate of plant variety protection is to grant unto the said applicant(s) and the successors, heirs or assigns of the said applicant(s) for the term of eighteen. Years from the date of this grant, subject to the payment of the required fees and periodic replenishment of viable basic seed of the variety in a public repository as provided by LAW, the right to exclude others from selling the variety, or offering it for sale, or reproducing it, or importing it, or exporting it, or using it in producing a hybrid or different riety therefrom, to the extent provided by the Plant Variety Protection Act at. 1542, as amended, 7 u.s.c. 2321 et seq.)

SOYBEAN

193811

In Lestimonn Watercot, I have hereunto set my hand and caused the seal of the Plant Variety Protection Office to be affixed at the City of Washington, D.C. this 31st day of August in the year of our Lord one thousand nine hundred and ninety-four.

Allest:

Kenneth HEvans

Exhibit A: Variety 9381 evolved from a cross of varieties (Essex x L69-4143) x 'Sprite'. It is an F5-derived variety which was advanced to the F5 generation by modified single-seed descent. The F6 progeny row of 9381 was grown in Illinois during the summer of 1984. Subsequently, 9381 has undergone five years of extensive testing and purification and has been observed by the breeder to be uniform and stable for all plant traits from generation to generation, with no evidence of variants.

6.6 acres of 9381 (breeders seed) were grown in 1988. 148 acres of parent seedstock (foundation seed equivalent) were grown in 1989.

Exhibit B: Variety 9381 most closely resembles the varieties A3733 and A3935. 9381 has white flowers, tawny pubescence, and yellow seeds with black hila and dull seed coat luster. A3733 and A3935 have purple flowers.

Exhibit E: Pioneer Hi-Bred International, Inc. is the sole, original, and first breeder of soybean variety 9381, for which it solicits a certificate of protection.
